

Steps for hanging your Quilt Hanger:

- Fasten your Quilt Hanger to the wall
- Attach the Quilt Clips evenly spaced to your quilt
- Slide the quilt, with Quilt Clips already attached, into the groove in the Quilt Hanger

Below are the details for the 3 steps above:

Step 1 – Fasten your Quilt Hanger to the wall

1. The vertical orientation of the Quilt Hanger is very important. Be sure the narrower section above the groove is up (see pictures on my website). Then use a level to assure the hanger is level and mark a light pencil line on your wall for reference. The 3M Command strips will do the job of hanging (without using screws into your wall) and can be removed if needed at a later time, cleanly and without removing wall paint. See instructions on the strip package.
2. Estimate the combined weight of the Quilt Hanger plus quilt and buy enough 3M strips to handle that weight plus a little extra to be safe. For example if the combined weight is 16 pounds, use about five 3M strips rated at 4 pounds per pair
3. Using the above example, place 5 light pencil marks on the Quilt Hanger, evenly spaced along the hanger, where the 3M strips will be located.
4. For best results, follow the cleaning instructions carefully for the 3M strips, cleaning both the Quilt Hanger and the wall.
5. Squeeze pairs of 3M strips together firmly to interlock the fibers, remove the adhesive from one side only, and place them on the Quilt Hanger in the previously marked locations. Apply firm pressure for at least 30 seconds as instructed.
6. Decide where you want the Quilt Hanger located on your wall, use a level to assure it is indeed level and mark both ends with a light pencil mark on your wall.
7. Now take the Quilt Hanger and remove the adhesive from the other pair of the five 3M Command Strips and carefully place the Quilt Hanger on the wall using the marks from step 6 to assure it is level. APPLY FIRM PRESSURE FOR AT LEAST 30 SECONDS over each 3M Command strip.

Step 2 - Attach the Quilt Clips evenly spaced to your quilt

1. Place your quilt on a table and begin attaching the Quilt Clips.
2. Loosen the Quilt Clip by turning the thumb nut counter clockwise. Place the quilt under the wider, as opposed to narrower rounded end of the Quilt Clip (see pictures on my website)
3. Place one Quilt Clip 2 to 3 inches from each end of the quilt, and any remaining clips evenly spaced in between. Hand tighten the thumb screw firmly. Do not overtighten.
4. Sufficient Quilt Clips are provided with each Quilt Hanger to provide a spacing of 12 to 16 inches, but more Quilt Clips can be purchased separately if desired.
5. Now with the Quilt Clips firmly attached to your quilt, and the Quilt Hanger attached to your wall, it's time to hang your quilt

Step 3 – Slide the quilt, with Quilt Clips already attached, into the groove in the Quilt Hanger

1. Locate the end of the Quilt Hanger with the large entrance hole. It may be located to either the left or right side of your Quilt Hanger
2. Take the quilt with the Quilt Clips already attached (as in Step 2 above) and place the screw head protruding from the back of the Quilt Clip into this large entrance hole.
3. Then just slide the Quilt Clip along the Quilt Hanger to the desired location. Do the same for each Quilt Clip. DONE!
